Steven Wilkinson
Duke University

Codebook

Processing notes for Study 4342:

1. The current data are being released as an Excel file because of the many string variables it contains.
2. These data are being released as is. The processing performed on this data was minimal.
3. If the user chooses to enhance the file, please feel free to submit the enhancements to ICPSR.

Dataset on Hindu-Muslim Violence, October 8, 2004

Ashutosh Varshney and Steven I. Wilkinson

Background

These data on Hindu-Muslim riots in India from 1950-1995 were collected from 1993-1996 by Ashutosh Varshney and Steven Wilkinson, with partial financial support from the Rajiv Gandhi Foundation (RGF), New Delhi, and Harvard University's Weatherhead Center for International Affairs (WCFIA). Some of the coding was also supported by a grant that Ashutosh Varshney received from the Ford Foundation. We are grateful to all these funding agencies, none of which of course are responsible in any way for the content of the dataset, or for the findings reported in the two studies that have resulted from the authors' own analyses of the data: Ashutosh Varshney's *Ethnic Conflict and Civic Life: Hindus and Muslims in India* (Yale University Press, 2002), and Steven Wilkinson's *Votes and Violence: Electoral Competition and Ethnic Riots in India* (New York: Cambridge University Press, 2004). Earlier findings from the dataset were reported in our joint publication for the Rajiv Gandhi Institute: Ashutosh Varshney and Steven I. Wilkinson, *Hindu-Muslim Riots 1960-1993, New Findings, Possible Remedies* (Rajiv Gandhi Institute for Contemporary Studies, 1996).

The source for the riot data was the Bombay edition of *The Times of India*, 1950-1995. Full details on the coding protocol that was used by Varshney and Wilkinson and their team of research assistants is available in the attached document "V-W_data_entry_protocol", which is reproduced as an appendix in both the above books.

This full dataset contains a rich variety of data on the causes and precipitants of riots that has not yet extensively been mined by scholars.

Citation

These data should be cited as "Varshney Wilkinson Dataset on Hindu-Muslim Violence in India, Version 2," Ashutosh Varshney and Steven Wilkinson, October 8, 2004." We ask that you inform us if you use the dataset in published work by writing to us at varshney@umich.edu and steven.wilkinson@duke.edu.

Data Entry

These data were originally entered into a Filemaker Pro 3 database and subsequently imported into Filemaker Pro 5 and now Filemaker 7 formats. For the purposes of this data dissemination the data has been exported from FP7 into a comma delimited format (*.csv* format) that can easily read into commonly used programs such as Excel and Stata. One advantage of the .csv format is that it does not truncate the substantial "notes" section for each record.

Data Issues

Please tell us if you spot a problem or have a question on the data! Write to Steven Wilkinson at steven.wilkinson@duke.edu (cc'd to varshney@umich.edu) and we will try to fix the problem. No coding procedures can be perfect, so we encourage people to tell us about cases where they feel the codings could be improved.

To facilitate data merging and matching with existing datasets we have included two variables that Wilkinson used in his own data analysis: 1) a State Code two letter key and 2) a key field that combines state identifiers, year and month, so that "AP195809," for instance represents the State of Andhra Pradesh in September 1958.

Please note that these are the complete data except for the very weakest likelihood-cases. They therefore include –in the interests of making things as widely available as possible—some cases excluded from the data analyses in our books because they did not occur in India, or were not firmly identifiable Hindu-Muslim riots. For example:

- Cases of communal violence in *Pakistan* reported in the Indian press, for example the May 1961 violence in Khulna, Jessore and Rangpur.
- Cases reported in the Indian press for which no location could be firmly established.
- Three cases that we do not code as H-M riots: DE195508, DE196611, which were anti-cow slaughter riots, and PU195703 which appears to be an intra-Sikh issue.

These data should therefore be excluded in order to approximate the data we used.

Not every observation has an entry for every variable. Again, in the interests of completeness we provide the data. The fact that we include the "notes" file will, we hope, make it easier for other scholars and researchers to develop their own codings.

LIST OF VARIABLES:

Variable	Definition
YEAR	Year of Riot
MONTH	Month of Riot
MONTH_BY_N	Numerical Month of Riot (1-12)
DAY	Day on which Riot Began (if given)
COUNTRY	Country in which reported riot occurred
STATE	State in which reported riot occurred
STATECODE	Two letter Abbreviation for the State in which reported riot occurred
KEY	Two letter Abbreviation for the State in which reported riot occurred, followed by four number year and two number month code for the data on which the riot took place
DISTRICT	District in which the reported riot took place
TOWN_CITY	Town in which the reported riot took place
VILLAGE	Village in which the reported riot took place
KILLED	Reported number killed in the riot
INJURED	Reported number injured in the riot
ARRESTS	Reported number arrested in the riot
DURATION_I	Reported duration of the riot in days
SOURCE	Source of riot (*Times of India (Bombay),* for these data)

SOURCE_DAT	Date of Source
REPORTED_C	Reported cause of riot
LOCAL_PREC	Reported local event that precipitated riot
LINK_MADE_	Was there a reported link to an outside event?
OFFICIALS	Officials stationed in area or mentioned in reports of the riot
OFFICIALS_	Officials reported as having been suspended or transferred during and after riot
POLICE_VS_	Reports of police vs single group during the riot
DALIT_MUSL	Reports of Dalit vs Muslim violence during the riot
TYPE_OF_PO	Type of police presence in the area
CODING_QUE	Coding Question
PROBABLE_C	Probability
RELIABILIT	Reliability
NOTES	Notes on riots from press, including information necessary to support codes
